TI2000-155 Tow Cart for TI5400 Series GPUs

Power Anytime, Anywhere

The Tesla™ TI2000-155 is a custom stainless steel cart designed especially to hold Tesla's ™ TI5400 Series Storage Cases. The cases can be secured directly to the cart, making the TI2000-155 the safest way to support and transport any TI5400 model out in the field and through hangars and flight lines.

What's more, you can operate the TI5400 GPU without ever removing it from the cart – simply remove the lid of the Storage Case for access to the entire unit. And you can rest assured that Tesla™ stands behind the Tow Cart with a team of customer service professionals and a 2-year warranty.

Features:

- Rugged stainless steel construction
- Anti-FOD flat-free tires
- Manual rear disc brakes
- Tow handle with handle release
- Front wheel steering via tow handle
- Four stainless steel compression draw latches to secure case to cart

The POWER of RED™

MADE IN USA

Features and Benefits

Stainless Steel Construction

At the heart of the TI2000-155 Tow Cart is its expert design and tubular stainless steel frame. A frame strong enough to support more than 2,000 pounds over uneven terrain. Rust and corrosion-resistant, the super-tough frame requires little maintenance and will last for years to come.

Figure 1: Stainless Steel Latch

Stainless Steel Latches

Four heavy duty stainless steel latches (Figure 1) give you the ability to secure the TI5400's Optional Storage Case to the frame of the Tow Cart. This assures that your GPU is secure and will not shift or bounce around when being transported. The latches attach to the bottom of the storage case – so even when the lid is removed, the bottom of the case provides a stable base for your TI5400 unit.

Figure 2: Rear Brake Caliper

Rear Disk Brakes

The Rear Disc Parking Brakes (Figure 2) can be locked into place with just one hand via the hand brake (Figure 3) positioned at the front of the cart. Locking the brakes while the unit is in use or being stored can prevent damage to the equipment and injury to personnel.

Tow Handle with Handle Release Pedal

Another safety feature on the TI2000-155 Tow Cart is a stainless steel Tow Handle that locks into place in the upright position (Figure 4). This means that the handle is safely out of the way while the unit is being used or stored. To unlock the handle, simply step down on the release pedal and pull the tow handle forward.
